people are out there and this task was completed. Anne's task force was for ET progress and the findings of Leo's task force.

Next topic of discussion deals with curriculum categories using the Crosswalk that contains 3-5 categories that is satisfactory for approval. Fire/Life Safety Industry-wide standard has been approved. In order for the Non-Residential Lighting Technician to approve, a template is necessary to measure from.

Comment from Administrator/Dean of San Joaquin Community College re: courses spelled out on the crosswalks.

Education Providers Report

The Chair read from the agenda list regarding "Partial Applications" and noted the schools that have completed the entire approval process are as follows:

- Chabot College
- Riverside College

Motion seconded and carried to approve the schools as partial Education providers.

Al spoke about the 32 hour continuing education (CE) requirement in 291.5(a) Regs. He claimed is too narrow in the Regs. Al's example is HELIX an established program limited emphasis on safety and technical and private post secondary education for people to get easy to get quality CE units.

There was a recommendation for code component to strike out 4 words from regulations "from an education provider".

Comment: Educational Provider Defined AB 1087.

Dan Whooley stated training must include code updates.

Dave Rowan stated he would check with Electrical Industry contacts to get feed back on this issue.

New Motion: motion seconded and carried that all ECCC approved education providers may offer courses to satisfy the 32 hours of further electrical education as required in Section 291.5(a) of the regulations.

The education providers on today's agenda that did not have approval action taken on their behalf are listed below. These schools will be listed in the next ECCC agenda as an action item. They are:
